

# Community Update, 29 September 2016

As we recently advised, Kimbriki and Australian Native Landscapes are currently upgrading the vegetation processing area at Kimbriki and installing a new aeration system.

The new AERO-SORB Platform is active and operational, and all vegetation shredded since 19 September has been placed onto the Platform.

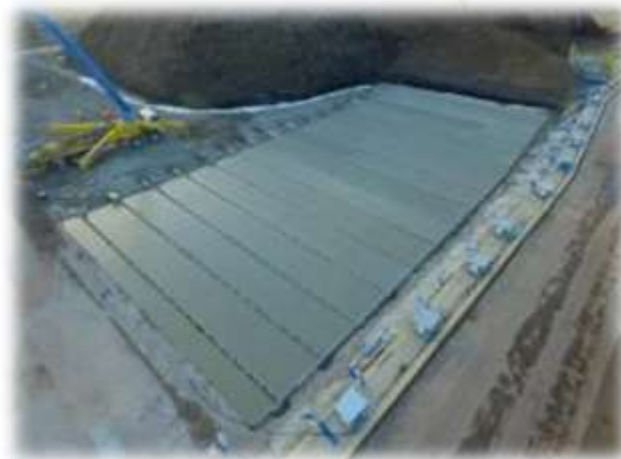

The movement of the existing stockpiles of vegetation commenced last week. The size and scale of the existing stockpile is large, meaning that when it is moved to the AERO-SORB Platform, it will take some time and potentially have short-term odour impacts.

The stockpiles will continue to be moved on weekdays between now and November, and only under optimal weather conditions.

We thank the residents who contacted us in regards to odour over the past week. All notifications were acted on as soon as received. Monitoring was conducted immediately and the verified odour issues were conveyed to ANL.

## Odour Observations

Should you observe any odours during these scheduled works, we encourage you to contact Kimbriki by:

- using the Odour Observation Tool
- or phoning 9450 0561
- or emailing [kimbriki@kimbriki.com](mailto:kimbriki@kimbriki.com)

*If you wish to receive these Kimbriki Community updates via email, please email [kimbriki@kimbriki.com](mailto:kimbriki@kimbriki.com) with **“Subscribe to Community Updates”** in the subject line.*

## Have you downloaded the Kimbriki Connect App yet?

- Kimbriki Connect gives you Kimbriki information in real-time
- Register to receive site alerts, news updates or general information about Kimbriki
- Join the Neighbourhood Connect section - a private section just for Terrey Hills, Ingleside and Duffys Forest residents. This section offers news, environmental reports, a chat section and a link to the Odour Observation Tool
- Kimbriki is strongly committed to the community, our customers and site visitors, and we want to be able to keep you informed of our activities
